a documentation comment

```
b \ a -- b
c
```

Printt number n , if $n = 6$, break.

```
: print \ n --
  dup . cr
  dup 6 = if dup break then drop ;
```

Run a loop from 1 to 10 and get a surprise...

```
: my-loop \ --
  ' print 1 10 loop "exit at: " . . cr ;
```

This is the main loop.

```
my-loop
```

```
: word
  first
```

comment

```
second ;
